Long-Term Non-Endowment Investment Portfolio

The Long-Term Non-Endowment Portfolio maximizes capital appreciation and income to grow grantmaking beyond the initial investment. The portfolio leverages higher levels of investment risks to obtain market-like returns and is best for donors who intend to grant funds over a long period of time.

Investment Narrative

Quarter ending June 30, 2024

The Long-Term Portfolio delivered a 1.2% return over the quarter against the benchmark's 1.6% return and an 11.7% return for the fiscal year against the benchmark's 12.2%. Performance was bolstered by domestic large-cap equities. Detractors from performance were the non-U.S. equity and hedge fund allocations. The hedge fund book was largely flat to moderately up for the quarter, though a handful of strategies experienced more material negative performance and dragged down overall performance. We are in the process of reducing our allocation to hedge funds and reallocating to equities and fixed income. We believe this will reduce the overall volatility of the portfolio and give the opportunity to capture more of the strength in public equities and fixed income.
